

ROOCON

ANOTHER QUALITY PRODUCT!

The smart sand dispenser unit is a static body with inbuilt self aligning conveyor system. The material is discharged at the rear of the body by way of a rubber belt conveyor and is driven by either a separate motor or can be run off the vehicles PTO system.

Smart Fabrication currently manufactures **3 different & unique designs**, each tailored to suit different size/capacity machines and applications. The design, manufacture, testing and checking is performed in accordance with the procedures specified in our quality system. The Roocon is a **100% Australian made & owned** product & is manufactured at Smart Fabrication's workshop in Adelaide.

CAN EMPTY A FULLY LOADED BIN IN AROUND 4 MINUTES!

CAPABLE OF DISCHARGING ALMOST ANYTHING FROM SAND THROUGH TO 20MM CRUSHED ROCK!

All designs are **drawn up in 3D** enabling the customers customizations areas and be able to see them in operation before fabrication has begun. Each Roocon is **custom made to suit the customers truck**. The conveyor belts can be controlled via remote used by the operator. The remote is capable of stopping & starting both belts, opening & closing the rear door, lowering & raising the feed conveyor and slewing the conveyor 180 °.

The cabin also features a **7" LCD screen** linked to **2 camera's** at the rear & inside of the hopper, allowing the driver to keep an eye on the level and flow of dirt in the hopper.

Combine with Smart Fab's **Light Guards, Camera Guards & Vandal Guards** for the ultimate protection for your machine
